MEMORANDUM FOR: Inspector General

SUBJECT: Effective Utilization of Psychological Services in CIA

The effort in the attached paper has been (1) to indicate the widespread, uncritical, and uncoordinated efforts to use psychological services in CIA; (2) to state explicitly the problems involved in effectively utilizing psychological services; (3) to give my conception of the relationships of psychologists to management and to other professions—a conception I am confident would be shared by a majority of the well qualified members of my profession; and (4) to recommend courses of action which are consistent both with management prerogatives and with particular professional capabilities.
